

# Mridul Jain

Generative AI Engineer | Agentic AI | Python Developer

+918770391126 mriduljn4@gmail.com jain-mridul Gwalior, India

## PROFESSIONAL SUMMARY

Agentic AI and Python Engineer with over **4.5 years** of enterprise software engineering experience, including **2 years** in Generative AI and Agentic AI. Skilled in building end-to-end production AI solutions using **Microsoft AI Foundry, Azure OpenAI, LangChain, and LangGraph**, focusing on RAG, multi-agent systems, tool integration, LLM evaluation, deployment, monitoring, and optimization. Proficient in **Python backend development**, REST APIs, cloud, CI/CD, and enterprise AI automation.

## WORK EXPERIENCES

**Senior Associate Consultant** | Full-time Jan 2025 - Present  
Infosys Limited On-site • Gurgaon

- Engineered an **agentic AI architecture** for a RAG application on **Microsoft AI Foundry** utilizing **Azure OpenAI, LangGraph, and Azure AI Search**, enhancing retrieval relevance by **~45%** and decreasing response latency by **~20%**.
- Developed tool-augmented AI agents with dynamic retrieval, integrating 5+ enterprise tools and data sources to enhance answer grounding and automate knowledge workflows.
- Constructed an LLM reporting pipeline converting inspection and telemetry data into standardized reports, reducing manual preparation effort by **~40%** and improving auditability.
- Implemented **Azure Application Insights** and **GitHub Actions CI/CD** for AI workloads, reducing deployment effort by **~30%** while enhancing production monitoring and reliability. Additionally, implemented authentication and authorization using **JWT, Microsoft Entra ID, and OAuth2.0**.

**Technologies / Skills Used** : LangGraph, Azure AI Search, GitHub Actions, LLMops, Azure OpenAI, Microsoft AI Foundry, AKS, Docker, Python, AI agents, Retrieval-Augmented Generation, Model Context Protocol

**System Engineer** | Full-time Apr 2021 - Jan 2025  
Tata Consultancy Services (TCS) On-site • Bangalore

- Designed and developed scalable Python backend services and REST APIs** using FastAPI and Django, supporting enterprise applications and multiple concurrent integrations across microservices architecture and downstream systems.
- Built Python-based automation scripts for real-time monitoring of critical system tables and application processes, enabling proactive issue detection and **reducing manual monitoring effort by ~60%**.
- Automated end-to-end reporting workflows using Python and Excel, including data extraction, transformation, validation, and report generation, **reducing report-generation time by ~90%** and significantly minimizing manual data-processing activities.

**Technologies / Skills Used** : Python, FastAPI, Django, REST APIs, AWS, Cloud, S3 Bucket, microservices architecture

## PROJECTS

**AI Knowledge Assistant**

- Developed an enterprise conversational AI and knowledge assistant solution using **Microsoft Copilot Studio** for deployment through Microsoft Teams and Microsoft 365 Copilot.
- Integrated **Azure AI Search** and **Azure OpenAI** to retrieve assurance guidance, assemble grounded Large Language Model responses, and deliver source-cited answers at scale.

**Technologies / Tools Used** : Microsoft Copilot Studio, Azure AI Search, Azure OpenAI, Power Platform, MCP

**Risk Assessment Agent**

- Developed a **multimodal agentic audit solution** using Microsoft AI Foundry to process diverse document formats and financial inputs.
- Designed intelligent automation workflows to identify risks, recommend classifications, and generate rationale-backed audit recommendations aligned with compliance guidance.

**Technologies / Tools Used** : Microsoft AI Foundry, Azure AI Search, Agent Framework, Telemetry, Observability, MCP, Evaluation

## SKILLS

|                                         |                                                                                                                                                    |
|-----------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Agentic AI &amp; Orchestration</b> : | LangChain, LangGraph, Tool Use, Prompt Engineering, MCP, Design Patterns, Agent Framework, Monitoring, Security, Observability, Evaluation, Memory |
| <b>Generative AI &amp; LLMs</b> :       | Azure OpenAI, Claude, Vector Databases, Hugging Face, RAG Pipelines, Pinecone, FAISS                                                               |
| <b>Microsoft &amp; Azure AI</b> :       | Azure AI Search, Azure AI Foundry, Copilot Studio, Microsoft Fabric, Azure Application Insights                                                    |
| <b>Backend &amp; APIs</b> :             | Python, FastAPI, Django, Flask, REST APIs, NoSQL, MongoDB                                                                                          |
| <b>Tools &amp; Platforms</b> :          | Docker, Redis, Git, GitHub Actions, CI/CD, MLflow, LiteLLM, VSCode                                                                                 |

## EDUCATIONS

**Rustamji Institute of Technology, BSF Academy** | Tekanpur, Madhya Pradesh 2016 - 2020  
B.E., Electronics and Communication Engineering

## CERTIFICATIONS

- Infosys Certified Applied Generative AI Professional
- Infosys Certified Generative AI Professional — Foundation
- Full-Stack AI with Python: LLMs, RAG, Agents & LangGraph — Udemy
